[Best Practices](#)

Card Not Provisioned in Android Pay (isReadytoPay == False)

Purchase flow - Item is in the Cart

Android Pay does not show as a payment method in the purchase flow

Card Provisioned in Android Pay (isReadytoPay == True)

UI/Branding

The "Buy with Android Pay" button or Android Pay logo uses official images and sizes

Item is in the Cart

All relevant info (total price, taxes, shipping costs) presented before user confirms order

Purchase flow works correctly in non-US locale settings

If pre-auth is setup: (not required)

Pre-authorized users can switch to a different card within Android Pay (e.g. with an edit button) before user confirms order
