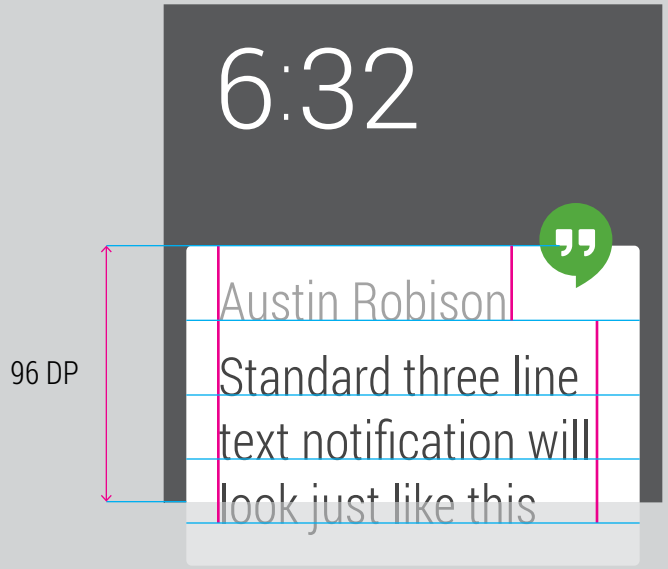
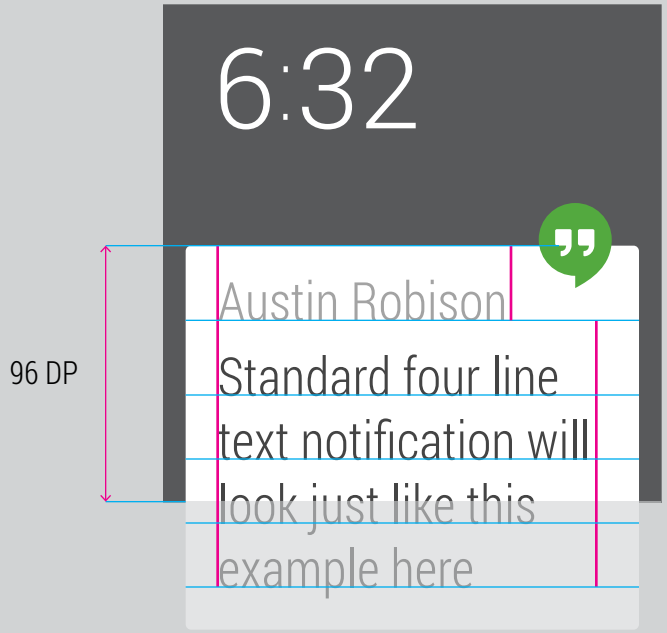
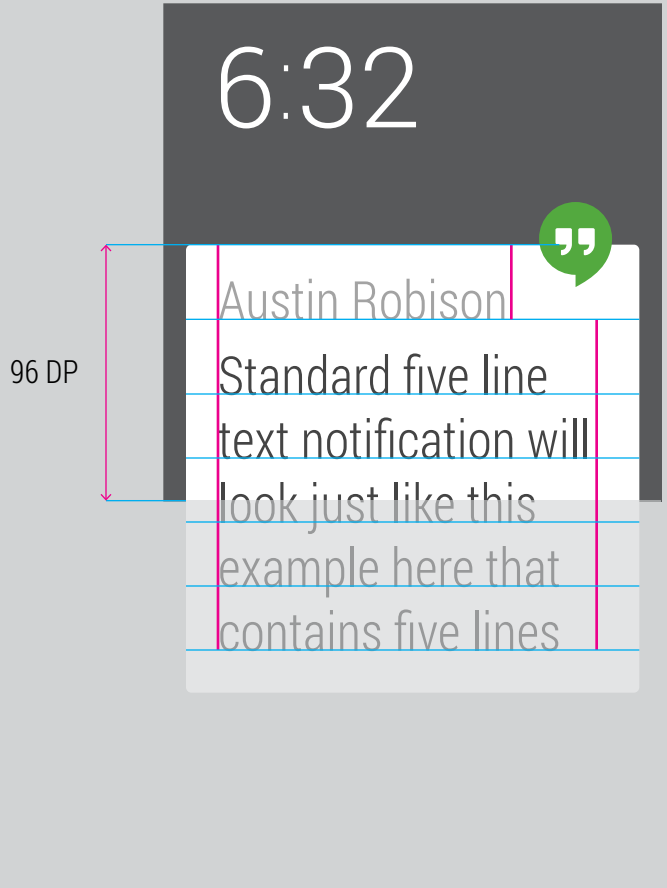
If a card is any taller than **96 DP** we have to push a bit of it below the fold.



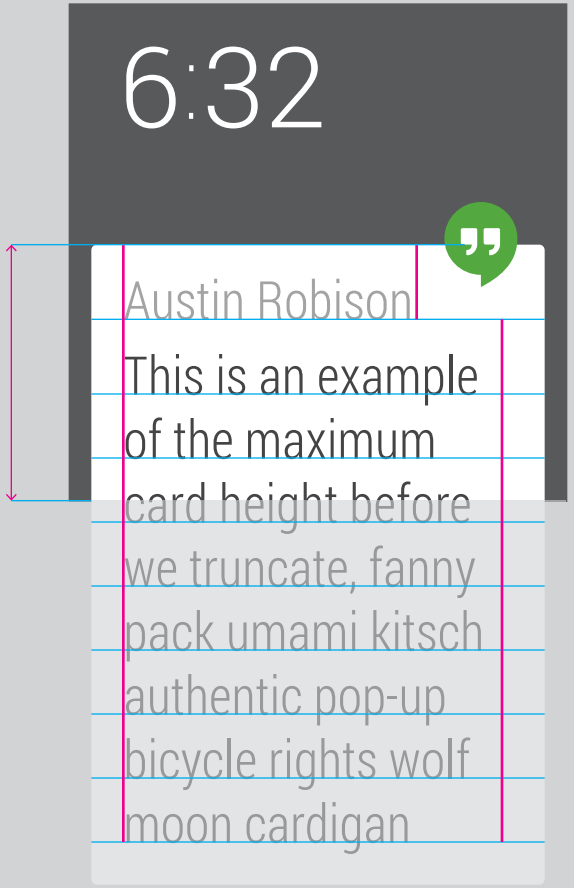
Every line of text adds **24 DP** to the height of the card. Oh man that's so cool!



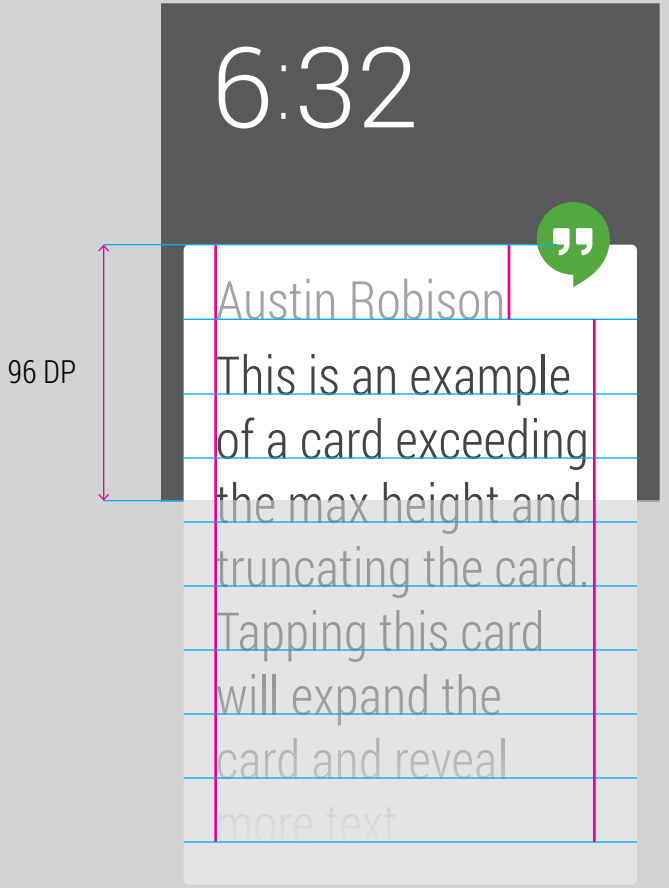
8 DP BLOCK



9 lines of text, or 240 DP is safe. This is the max size before we need to truncate.



Taller than **240 DP** or 9 lines of text? We fade you out at the bottom and truncate you.



8 DP BLOCK

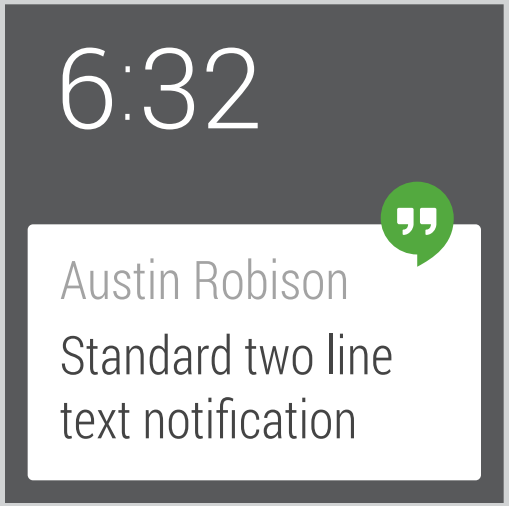
This just so happens to be the smallest card you'll ever see. Imagine that. It's only **72 DP!**


At **96 DP,** this sucker is the tallest card that will ever float on your home screen.
